# Changing inconveniences of all people to conveniences of all people

➤ Various kinds of people feel inconveniences.

How could these inconveniences be eliminated?

- 1, At first, we listen to the opinions of people who feel inconveniences.
- 2, We examine the methods to eliminate inconveniences
- 3, And we put them into effect in cooperation with government, regional society, manufactures and people of industrial organizations.
- 4, We inform people how inconveniences were eliminated.

\* Most of people do not know what kind of troubles or how troublesome everybody feels. It is very important to get opinions from various points of view and study together the methods to eliminate troubles.

Let us help make the society easy to live  
by collecting ideas of all people.

**We can achieve everybody's  
convenience  
thanks to your cooperation!**

Thank you for your kind attention.
